Cobra Enterprises of Utah

Known as a "small pocket pistol", derringers are extremely concealable offering affordable personal protection. The Cobra Enterprises' Derringer series consist of the Standard Derringer, the Big Bore Derringer and the Long Bore Derringer.

Each model has a variety of caliber choices ranging from specialty calibers to more standard calibers such as .22 Mag, .38 Special, and 9mm. All of the derringers are very lightweight with the standard derringer weighing less than ten ounces and the largest of the series, the long bore, weighs only sixteen ounces.

The derringer series is equipped with a choice of bright chrome, black powder coat or satin nickel finishes. Grips are available in unbreakable pearl, molded black synthetic or laminated rosewood depending on the model.

All of Cobra's pistols come with a steel barrel, steel striker type firing mechanisms, positive plunger type safety and hammer half-cock to prevent unintended discharge and a lifetime factory direct warranty. The Derringer Series price range is \$135.00 to \$155.00 MSRP.

Also available from Cobra is their Patriot Series, it's a cost-effective

double action line of pistols that come in .380, 9mm, or .45ACP calibers. Each pistol is a double action system, built with a black polymer frame and stainless steel slide. Each Patriot is also equipped with a locked-breech so that the bolt is secured to the barrel until an outside force releases it. The .45 has a non-

slip trigger-guard for added safety. The Cobra's Patriot series is held to high manufacturing standards, yet they are very affordable. The Patriot line ranges from \$312.00 to \$365.00 MSPR. For more information visit www.cobrapistols.com or contact Cobra Enterprises of Utah at 801-908-8300. CIRCLE 105
